

# 6 Shooter™

Adult Cattle Multi-Dose Balling Gun / Oral Drencher  
Bio-Vet's '6' Shooter™ is convenient, versatile and economical

## Key Features:

- Durable, all PVC construction

**RECOMMENDED USES:** Administration of multiple veterinary boluses, capsules, magnets or oral liquid drenches to adult cattle.

## DIRECTIONS FOR USE

### BOLUS, CAPSULE, MAGNET ADMINISTRATION:

- 1) Holding gun in horizontal position, pull back on plunger.
- 2) Insert desired number of boluses into tip of gun. Place gun into mouth of properly restrained adult cattle only.
- 3) Slowly advance plunger to dispense boluses at very back of mouth, behind teeth, allowing adequate time for animal to swallow each bolus. Remove gun from animal's mouth and clean and dry gun between uses.

**ORAL LIQUID DRENCHES:** With gun properly placed in animal's mouth as described above and plunger fully advanced, slowly pour liquid into opening on the **end of the plunger** allowing animal to swallow liquid. Remove gun from animal's mouth and clean and dry gun between uses.  
**This gun is not recommended for caustic drenches nor drenches over 500 ml in volume!**
