## Electrolyte / Nutritional Supplement for Calves

### GUARANTEED ANALYSIS: (minimum per gram)

<b>Salt (minimum)</b>	7.3 %
<b>Salt (maximum)</b>	8.7 %
<b>Sodium (minimum)</b>	6.9 %
<b>Sodium (maximum)</b>	8.2 %
<b>Potassium</b>	1.96 %
<b>Lactic acid bacteria</b>	50 million CFU

(Lactobacillus acidophilus, Enterococcus faecium, Lactobacillus casei, Bifidobacterium bifidum, Bifidobacterium infantis, Bifidobacterium longum, Lactobacillus lactis, Pediococcus acidilactici)

### INGREDIENTS:

Dextrose, sodium bicarbonate, sodium chloride, potassium chloride, glycine, sodium acetate, sodium propionate (preservative), sodium silico aluminate, monosodium phosphate, magnesium sulfate, hydrolyzed yeast, inulin, dried kelp, thiamine mononitrate, riboflavin, niacin, calcium pantothenate, pyridoxine hydrochloride, biotin, folic acid, vitamin B12 supplement, ascorbic acid, flavor, dried Lactobacillus acidophilus fermentation product, dried Enterococcus faecium fermentation product, dried Lactobacillus casei fermentation product, dried Lactobacillus lactis fermentation product, dried Pediococcus acidilactici fermentation product, dried Bifidobacterium bifidum fermentation product, dried Bifidobacterium infantis fermentation product, dried Bifidobacterium longum fermentation product.

### RECOMMENDED USES:

Nutritional supplement for mixing with daily water supply, for dehydrated calves at shipping, during fluid loss, when experiencing intestinal upset, off-feed due to shipping, handling, disease, or hot weather, to reduce shrink, in conjunction with veterinary therapy for diarrhea, other times listed nutrients, electrolytes and microbial cultures are desired.

**FEEDING DIRECTIONS: Enclosed scoop holds 40 grams electrolyte powder when filled level to rim.**

**Daily feeding during hot weather** - Mix at following rates with daily drinking water offered between milk feedings. One level scoop (40 grams) per gallon of water to two level scoops (80 grams) per 5 gallons water; 5 Kg pouch per 125 to 300 gallons of water; 20 Kg bag per 500 to 1,200 gallons of water.

**Dehydrated calves, calves with diarrhea** - Mix 80 grams (2 level scoops) with warm water to make 2 liters of electrolyte solution. Feed 2 liters of resulting electrolyte solution twice daily or as a drench or with a stomach tube for calves up to 250 lbs. body weight.

For calves fed milk or milk replacer, separate milk / milk replacer feeding and electrolyte solution feeding by at least 30 minutes or alternately feed milk or electrolyte solution at intervals spaced evenly throughout day. Consult veterinarian for proper drenching / tubing procedures. Discard any mixture not used immediately.

**STORAGE:** Keep closed tightly between uses. Store in cool, dry place.

### PRODUCT CODE

<b>GN-00263</b>	5 kilogram (11 lb) (62 feedings) pouches (4 / case)
<b>GN-01266</b>	20 kilogram (44 lb) (250 feedings) bags (1 / case)
<b>GN-01266</b>	20 kilogram (44 lb) bags (50 bags / pallet)
