RECOMMENDED USES

Drench cows at calving as part of routine fresh cow management protocols.

FEEDING DIRECTIONS

Feed via esophageal-rumen tube.

Immediately after calving: Mix 0.75 pounds (1.5 cups) powder into 5 gallons of warm water.

For next two days: Mix 0.5 to 0.75 pounds (1 to 1.5 cups) powder into 5 gallons of warm water and feed once daily.

Do not feed dry powder to cattle. Avoid contact with eyes. For animal use only.
